Strawberries and Raspberries in Bountiful Supply.

NEW POTATOES DRIFFING LOWER.

A Scarcity of Lake Fish, Charged Up to Ohio Prohibition.

THE OCCUPATION OF FLORISTS GONE

OFFICE OF PITTSBURG DISPATCH, FRIDAY, June 21, 1898. Vegetables and fruit are in good supply, but below standard as to quality on account of rainy weather. Strawberries are not coming in in the best shape, and for the best, prices are firmer than for a few days past. spherries, both red and black, are coming freely, and the time for the strawberry for this ason approaches its end. Ripe currants are found on the stalls for the first time the past week. New potatoes are drifting downward. Cabbage should sell at low prices, as produce jobbers report that the buyer can name his own figures.

A Diamond market vender of fruits and vegetables reports trade this week as an improve ment on last week. Said he: "Stuff is coming in in rather bad shape on account of the continu-ous rains, but demand is good, and our cus-tomers want the toods all the same." In the line of butter, eggs and poultry dealers

The supply of country butter has been in excess of the demand all the week. Creamery feels the effect, and the situation of the butter market is at this date in the buyer's lavor. Fish are not in supply sufficient for demand. The laws of Ohio forms the use of the net after the 18th of June and because there has been a Fish are not in supply summent for demand. The laws of Ohio forms the use of the net after the 15th of June, and hence there has been a dearth of lake salmon, white fish and trout the past week. Eastern fish are in good supply. Wholesale rates have advanced, but retail prices are unchanged. A leading dealer said to-day "our profits are about wiped out in Wostern fish by express charges. From Erie and Sandusky the express charges are \$5 per barrel, and from Port Huron and Detroit \$4. The Ohio laws saginst fishing after June 15 are not in operation in Michigan, but as our chief source of supply is from the former State we have been short of stock for the past week."

Florists are doing little at this season, because all who have gardens are able to rase their own flowers. Said one of the leading florists: "Trade is poor, and will remain so for a couple of months. At this time of the year people in general raise their own flowers, and make few demands on our trade. Even the funeral trade is slack for some unacconntable

neral trade is slack for some unaccountable reason. People here have spent their spare money to help Johnstown sufferers, and have little left for floral display." Following are the latest retail prices of mar-ket basket filling, as furnished by leading

Rollroad Mileage of the World. The latest estimate of the railroad mileage of the world is given in a German periodical. The the world is given in a German periodical. The conclusion is that there are \$24.40) miles of railroad in existence, in which \$26,500,000,000 is invested. The capital in Europe is \$118,000 per mile and in other countries \$86,000. Nearly one-fourth of the mileage of the railroads of the world has been constructed during the last four years. This country leads all others in the amount of mileage, which is placed at \$50.700, a low estimate. Of the European countries Germany leads with \$24,000 miles and France, England, Austria and Russia come next in the open named, the latter reporting \$5.00 miles.

The Whent Pit Still Influenced by the Weather, Reports of Which Are Very Contradictory-Prices Exhibit a Declining Tendency-Pork Firmer.

CHICAGO. - Only a moderate business was done in wheat to-day. It was again a weather market, and the feeling was a little unsettled, with the undertone apparently weak. July opened Mc higher, eased off Mc, then advanced Mc, but later became sweak, declining Mc, and closed about the same as yesterday August was weaker, and after advancing %c, declined 1/4c, and closed 1/4c lower than yester-day. December closed 1/4c lower.

The early strength was due to a report of continued wet and rainy weather in the Southwest, where the grain is ripe, but cannot be harvested on account of the fields being too wet. Cables, too, were stronger, noting good demand and better prices, with private cables stating that foreign markets are gaining strength from the reported damage to the Rus-sian crop. Domestic markets sympathized with the advancing tendency early, but later weakened.

The market ruled weak, due in part to rather free offerings by a promment trader. There was not enough outside support to sustain the market. Advices from the Northwest continue contradictory about the condition of the crops, some parties reporting them to look fine, and others had. Good rains were reported in that section last night, and this morning the weather

section last night, and this morning the weather was clear.

A fair business was reported in corn within a very narrow range, and the prevailing feeling was one of firmness. The principal feature was the desire on the part of local traders to cover by July shorts and put out lines for September. The market opened a shade above the closing prices of yesterday, was firm and advanced %%%c, cased off some and closed a shade better than yesterday.

Onts were fairly active, especially during the first part of the session. The opening was stronger, and prices for July advanced %%%c. Later offerings increased, and prices receased &%%c on July and %c on the more deferred futures, and the market closed steady.

Trading was moderately active in the market for mess pork, and the feeling was firmer. Obening sales were made at 10c advance, and a further appreciation of 15017%c was gained and well maintained.

Little interest was manifested in the lard market, and the feeling was steady. Prices ruled about 25% higher, and the market closed comparatively steady.

There was a fair business transaction in short rib sides. Prices were advanced 75% 610c, and the market closed steady at about outside figures.

Petroleum Fuel lu Germany.

The German correspondent of the American Artisan writes from Berlin as follows: Petroleum and naphtha are being used more for heating than ever before. Retort burners for petroleum have been introduced by a Munich firm. The oil is fed from a receiver by a rubber ball, which gives the necessary air pressure into a so-called retort, which has been previously heated by spirits—the oil is turned into vapor in the retort, and goes to a burner and heats a concave cap, and issuing fine perforations in this latter, begins to burn. The fiame is blue and not illuminating, and there is no smoke or smell. The combustion products, according to the inventor, are water, steam and carbonic acid, and no chimney is needed. Even the heavy Roumanian petroleum is now utilized for heating in public institutions, by having regulators, which mainly consist of steam atomizers. petroleum have been introduced by a Munich

DOWN THE VALLEY. Salient Features of the Country Along the Fort Wayne Road.

HANDSOME AND THRIVING TOWNS.

A Landscape Unsurpassed in Beauty by Any in Uncle Sam's Dominions.

A GOOD PLACE FOR PLEASANT HOMES

Those who suppose that the East End has a monopoly of everything that is good in the way of lands, houses and location are badly mistaken. It is a characteristic of the natural environments of Pittsburg that in whatever direction the eye is turned it rests upon a vision of loveliness that is rarely equaled in any part of the world.

If the East End elicits exclamations of delight from the beholder, the West End commands his admiration; if the Northside causes him to linger over its outstretching beauties, the Southside attracts him by its rugged spiendor. Nature has distributed her bounties in this vicinity with an unsparing and

A trip down the Fort Wayne Railroad as far as Sewickley is more than worth the time and trouble required to make it. The first place demanding attention is Bellevue, which is undemanding attention is Believue, which is undergoing improvement on an extensive scale.
It contains some pretty houses, and a number
of others are going up. It is a picturesque
place, and has a bright future before it.

Avion, formerly Birmingham, is another thriving village. Thirty acres of the estate of the late John Birmingham have been pur-chased by a syndicate composed principally of young Alleghenians, who intend to erect uses thereon for their own use. Of the remainder of this estate about 20 acres will be subdivided and the rest held for private use. Building operations will be begun by the syndicate in a short time.

Half a mile below Avion is Laurel station where a number of fine residences have recent-ly been built, and where several good building sites are yet unoccupied, and no doubt could be purchased at low prices in comparison with those prevailing in other localities no better

situated. The next station below is Emsworth, which, it is generally admitted, is one of the most beautiful spots around Pittsburg. It contains a large number of fine residences, which are all on high ground, and yet easy of access. The population, about 2,000, is composed of first-class people. There is considerable land in the vicinity, which can be purchased in tracts of from one to ten acres. The situation is admirable and the views unsurpassed. It has an abundance of pure water and good drainage. Dixmont, which comes next, is too well known to require special montion.

Leaving Dixmont and its mournful associations, Glenfield comes in view. It is nine miles from Union depot, has a population of about 1,500, and contains some handsome houses. It is a thriving village, and is ambitious to rise in

the world. Havesville is just below Glenfield. It was formerly a fashionable summer resort, but the destruction of its big hotel by fire some years ago gave it a setback from which it has not en-tirely recovered. It has a number of fine residences extending down toward Osborne station. Hayesville is a quiet, home-like village, with fine land and river views-just such a place as poets and painters delight to dream and work in.
Osborne station, which is really a continua-

tion of Hayesville, points with pride to several handsome residences. I was informed that there are a number of desirable lots for sale at low prices at this place.

valley, and it has been the seat of culture and enterprise for many generations. Many of the prominent men of the country bave lived in or been identified with Sewickley. It is full of ele gant houses, which are occupied by people who are prominent in business and social affairs.

Of the whole valley from Allegheny City to Sewickley and below, it can be said that it con-tains many of the finest locations around the city of Pittsburg. It has good railroad facilities, with a prospect of additional rapid transit by at least two routes, which are now in con-templation. These will afford means of ingress and egress equal to those possessed by any other section. This valley will, without doubt, soon become a prime favorite with those seek-ing a desirable location in which to establish

Farming lands in New York State are depreciating. The assessors in 14 counties visited found that farming lands had depreciated in value while city property had increased in value. State Assessor Wood is of the opinion that in a tew years there will be nothing much but tenant farmers in this State. The same facts are observed in Penusylvania.

It pays to plant willows. The examination which the Government Engineer in charge of the Potomac river improvement made shows that the water reached a height of 2 feet? inches above the high-water mark of the freshet of 1877, which was the highest of any

nown or recorded freshet.

The wisdom of planting willows upon the new lands has been justified. That portion of the newly-made flats upon which willows were planted was protected from washing, so that practically no damage was done there, while in the portions of the improvement which were not so protected there has been great loss.

The produce of gold from mines in the United States during the calendar year 1888 is estimated to have been 1.604,841 fine ounces of the value of \$33,175,000. In 1887 it was \$33,000,000. The produce of silver from mines in the United States during the calendar year 1888 is estimated to have been 45,783,632 fine ounces of the coining value of \$59,195,000. This is an increase of 4,515,327 fine ounces over the estimated production of 1887.

Since January 1 there have been reported 296 strikes, involving 75,110 strikers, against 389 strikes and 111,201 strikers in 1888 and 511 strikes and 212,317 strikers in five months of 1887.

He Mukes a Lame Attempt to Bear Bridgewater Gas.

The feature of the stock market yesterday was an attempt to bear Bridgewater Gas, which has been neglected for some time. One hundred shares of it were offered at 48 and snatched up in a jiffy. This absorbed the supply at that price. In the afternoon 200 shares of it changed hands at 50. Cinizens' Traction sold in a small way at 60% this being the first movement in it

for several weeks. Electric and La Noria were stronger. The other favorites were featureless as well as dull. The total sales were 365 shares, of which Bridge-water Gas furnished 330. There was no news to change the general situation. Bids, offers and sales were:

BETTER THAN EXPECTED. Business at the Banks in Good Shape for the

Season. Business was not rushing at the local banks yesterday, but it was of fair proportions for the season, when everybody tries to take things easy. A \$10,000 loan was made at 5 per cent easy. A \$10,000 loan was made at 5 per cent and a few smaller ones at 6. Depositing was a little better than usual of late, but checking was light. There was a gratifying movement in general trade, as shown by the Clearing House report. The exchunges were \$1,687,300 63 and the balances \$275,667 38.

Money on call at New York yesterday was easy at 25,683 per cent; last loan at 3 per cent; closed offered at 25 per cent. Prime mercantile paper, 37,605 2. Sterling exchange dull but steady at \$4.87 for 60-day bills, and \$4.88% for demand.

NO GOOD.

A Quiet Day in Oil, With a Lower Level of Prices.

The oil market yesterday showed no improv ment over those of the previous days of the week. The outside interest was conspicuously absent, and the professionals were not in a humor to do much trading. The sales during the day did not exceed 100,000 barrels. The opening, closing and fluctuations were the same

opening, closing and fluctuations were the same as on Friday of last week.

The market opened at 83%c, the same as Tuesday's closing. It then advanced %c, where it lingered for some time, when it dropped to 83%c, around which figure it held all the afternoon and at which it closed, with a bearish feeling. Thursday's clearings were 231,000 barrels.

There was considerable excitement in Ohio and Brighton townships, Beaver county, over the advent of men seeking oil and gas leases. They represent parties in Butler, Wasnington and Allegheny counties and in the Turkey Foot districts. A thousand acres have been leased, and wells will be sunk as soon as possible. All contracts call for work to be done in 90 days. The terms are one-eighth royalty for oil and \$500 yearly for paying gas wells.

New York, June 21.—Petroleum appears to have settled into a rutof dullness, and the space in which it is traded in at long intervals is deserted. No interest is attached to its movement, which is confined in a narrow range. The opening to-day was steady at \$354c; then yielded slightly, becoming dull soon after and remained so until the close, which was dull at \$354c. Sales, 64,000 barerls.

VANISHING GOLD

Used as a Pretext for Depressing Stocks Demonstrations Against the List Counteracted Late in the Day-Final Changes

Unimportant. NEW YORK, June 21 .- The heavy engagements of gold for export yesterday, which were further swelled by over \$1,000,000 to-day, making in all \$5,400,000 to go out by to-morrow's steamers, was a most conspicuous feature in the stock market to-day, and served to restrict trading to the smallest limits. It also encour-aged some demonstrations against the list, and London turned up as a seller this morning, which had the effect of opening the market off 1/2 to 1/2 per cent from last evening's figures. There is good reason for the suspicion, however, that the selling orders from London this morning were cabled from this side previously, as London was a buyer later in the day. The depression could not be maintained as the mar-ket reacted from the low prices of the opening ket reacted from the low prices of the opening immediately, and the offerings were absorbed without trouble through there was little bidding for stocks. The activity was all in the clique stocks and the trusts which, while no more active than usual of late, occupied a more prominent position in the market because of the dullness of the regular list. Lackawanna yielded to the pressure about 1/2 per cent, but no other stock could be brought down more than a shade, and everything rallied from first sales. sales.
Segar trust, which sold ex-dividend of 2% per cent. rapidly rose and finally more than recovered the dividend, although all of the improvement was not retained at the crose. The poor prospects of the reorganized road made Opio, Indiana and Western the weak point in the list, and it sold down from \$\mathbb{C}\$, to 5 and nion Pacific also daydoped considerable weakness in the first bary, which has reaffer.

cupied most of the attention, though considerable was heard about the Anthracite trust, but neither seemed to have any marked effect upon the course of prices. Duliness and stagnation became the only features of the market, except that Rock Island moved up sharply upon the denial that the road was to be taken out of the Inter-state Association, and the favorable reports of the condition of the crops along the line of the road. There was some depression in the afternoon, but a firm tone prevailed toward the close, which was dull and firm at something better than first prices. St. Paul was the only active stock of the regular list, while the three trust shares were all active. The final channes are without exception for fractional amounts only, and are very evenly divided between gams and losses. Missouri Pacific also sold exdividend of I per cent.

Railroad bonds were a little more active owing to the greater number of issues traded in, but there was no change in the general tone of the dealings, a firm tone existing with smaller unimportant fluctuations. The total business done aggregated \$1,792,000, of which the St. Paul, Chicago and Missouri River fives contributed \$139,000 and the Ohio Southern incomes \$121,000. Minneapolis and St. Louis seconds rose 234 to 5234; North Pacific terminals, 2 to 112: Ohio Southern firsts, 4 to 115, and Indianapolis, Decauter and Springfield firsts lost 33/5 to 100.

Boston—There hos been quite an active demand for wool. Prices remain very firm and archigher. The transactions of the week amount to 4.795,000 pounds, of all kinds, of which 2.597,000 were of domestic grades. Prices are higher on domestic wool owing to active movements and advancing markets at the West. The principal sales have been of new Texas, of which there have been sales of 880,000 pounds at prices ranging from 20c to 26c for fine and medium, but principally from 20c to 24c. Spring California wool has been fairly active with sales of 306,000 pounds at 16@22c. Oregon wool was quiet, but the only important sale being one of 20,000 pounds of choice new Eastern at 25c. Georgia wool was firm, selling at 30c. In Kentucky, Indiana and Missouri clothing wools have been sales at 25 to 30c; as to quality Western unwashed and merchantable fleeces sold at 30 to 33c for choice medium fat shoep, with other sales at 25 to 26c, and fine at 23 to 25c. Fine washed fleeces were dull and nominal. A small lot of new Michigan No. 1 combing sold at 40c. In pulled wools there have been sales of 25c,000 pounds, including super at 33 to 37c, and extra at 25 to 30c. Australian wool was active and firm, and sales are reported of 1,000,000 pounds in the range of 37 to 40c. Monte Video sold at 28½ to 29½ c. Carpet wools are fign, with an improving demand.

OFFICE OF PITTSBURG DISPATCH, FRIDAY, June 21, 1889. Country Produce-Jobbing Prices.

Ripe currants are to the fore in good supply New potatoes are drifting downward. Cabbage is slow at nominal prices. At the B. & O. station 300 crates of cabbage were refused by commission men to-day. A leading jobber of butter, eggs and cheese reports trade as good all the week until to-day, when it is quiet. Said he: "April was the only month this year which showed a falling off in our line. Last year was showed a falling off in our line. Last year was our best year by \$5,000 in totals. The first half of this year is ahead of the corresponding period of '88, and this in face of the fact that the stuff we handle is 20 to 25 per cent lower in price." Home-raised strawberries are not as plenty as for a week past. Black-cap raspberplenty as for a week past. Black-cap raspberries, home-raised, have put in their first appearance within a day or two. Constant rains the past week or two have had the effect not only of keeping back stuff, but bringing garden products to markets in noor shape.

PEREGRINE QUILL, in to-marrow's gives a vivid and charming description of life in an old English mansion.

SWIFT'S SPECIFIC cured me of malignant Blood Poison after I had been treated in vain with old so-called remedies of Mercury and Potash. S. S. S. not only cured the Blood Poison, but relieved the Rheumatism which was caused by the poisonous minerala.

GEO. BOVELL 2422 Third ave., N. Y. Scrofula developed on my daughter—swelling and lumms on her neck. We gave her SWIFT'S SPECIFIC, and the result was wonderful and the cure prompt.

S. A. DEARMOND, Cleveland, Tenn.

SWIFT'S SPECIFIC is entirely a vegetable remedy, and is the only medicine which permanently cures Scrofula, Blood Humors, Cancer and Contagious Blood Poison. Send for hooks on Blood and Skin Diseases, malled free, The SWIFT SPECIFIC Co., Drawer 3, Atlanta, Ga.
